

BREMBO'S COMMITMENT

THE GROUP'S RESPONSE TO THE COVID-19 EMERGENCY

Right from the start of the epidemic emergency, Brembo was able to react promptly by focusing on the health of all its employees as a priority objective, securing its factories, helping local communities with the distribution of medical supplies and supporting scientific research aimed at fighting the virus.

TARGET

- Protect the Group's employees.
- Prompt management of health and economic emergencies.
- Supporting the territory and the community.

ACTIONS

- Preparation of extraordinary measures to fight the virus and protect the health of its employees.
- Constant monitoring of business impacts, with a particular focus on the supply chain.
- €1 million donation to three Italian centres of excellence: the Papa Giovanni XXIII Hospital in Bergamo, the FROM Research Foundation in Bergamo and the Mario Negri Institute for Pharmacological Research, in support of research to combat the epidemiological emergency.

RESULTS

- Prevention, control and containment of the pandemic at all Brembo sites.
- Guaranteeing a safe resumption of business activities.
- Support for the territory and research.
