For immediate release

Brembo S.p.A. Leases Business Unit from a Supplier

Brembo S.p.A. underwrote a leasing agreement until 31 December 2011, for a business unit comprising two companies, from an important supplier of mechanical parts manufactured using technological processing techniques.

The deal was a necessary response to the financial difficulties in which Immc and Iral find themselves, given the need to safeguard the know-how and important technological expertise transferred by Brembo to the above mentioned companies over their many years of collaboration, as well as to ensure the continuity of supply to the Brembo Group.

The transaction was structured through a recently incorporated vehicle, La.Cam Srl, 100% controlled by Brembo S.p.A.

The production facilities of the leased companies are located in Berzo Demo (BS) and Sellero (BS), employ a staff totalling approximately 230 and manufacture high-precision metal parts and nuts and bolts that the Brembo Group normally uses to construct brake systems for OEM and racing cars and motorbikes.

Rent has been set at €1.8 million per year. The leased companies' sales, approximately €17 million, will not have any effects on the Group's consolidated revenue since output is entirely absorbed by the Brembo Group.

Within the end of the lease period and based on the results of the financial restructuring of the two companies, Brembo might be involved in any subsequent process of acquisition of the business unit.

The manager in charge of the Company's financial reports, Matteo Tiraboschi, declares, pursuant to paragraph 2 of Article 154-bis of Italy's Consolidated Law on Finance, that the accounting information contained in this press release corresponds to the documented results, books and accounting records.
