

PRESS RELEASE

Due to the objective emergency situation in the areas of Bergamo and Brescia (among the most affected in the world by the COVID-19 pandemic), where the Italian Brembo plants are based, the company has ordered that from March 16 to 22 its production activities in Stezzano, Curno, Mapello and Sellero will be temporarily suspended.

The decision is in line with the extraordinary provisions of the Italian Government and has the aim of protecting people's health and safety, in the face of the evolution of the COVID-19 pandemic and the consequent objective impossibility of operating continuously.

Brembo made this decision with a great sense of responsibility and in agreement with all the social partners involved, to intensify the measures already adopted since the early stages of spreading the virus and to ensure greater safety and serenity for all its people.

The company continues to monitor the evolution of the situation with the utmost attention and is ready to resume its activities with the commitment and gaze towards the future that has always characterized it.

Stezzano (Italy), 13 March 2020
