NEW PF 2x28 FLOATING CALIPER

Brembo presents the new PF 2x28 floating caliper manufactured under the BYBRE brand, created specifically for brake systems of small and medium displacement scooters and motorcycles.

Designed to maximize stiffness, the new caliper body is intended for applications requiring not only dependable braking performance, but also the assurance of a safe ride on wet or muddy road surfaces.

The new floating caliper is paired with a set of extra thick brake pads, guaranteed to both deliver even more reliable performance, and to provide maximum mileage under critical conditions.

In addition, the PF 2x28 is equipped with a new pad retaining spring for quick and easy servicing.

This new caliper was used for the first time on the Bajaj Pulsar 200NS.
